

ON-LINE PATIENT FOLLOW UP PROGRAM

On-line patient follow up program is available to all members of the EMS community and many surrounding rural hospital EDs. Simply go to our website and locate the **Request Patient Follow-Up** link along the left column. All care providers can request a follow up email that will be sent to their Training officer or Department designee. This provides valuable quality assurance information and allows for appropriate case review. This feature has been very popular for Trauma Alert patient follow ups as well as for Stroke alert, Cardiac alert, and Other complicated medical cases.

If your service or hospital does not have a password, please send your department designee's name and email to admin@ciemsd.org. Your department will be added to the list and a password will be sent to your designee for all providers to use.
